Robert L. Walz

24923 215 Ave

Leavenworth Falls, Mn 56537

Dear Sir,

Bois de Sioux Culverts in County 26. When CO. 26 was Rebuilt they raised the road, but did not provide for the water to move past the dam that was created by County 26. This was a mistake of Othtail County, Grant County and Bois de Sioux Watershed. I feel this would be a Great Time to undo the Mistake that was created in the past.

However with a new engineer with a fresh set of eyes he can come up with a Better solution. I am sure the Bois de Sioux was set up to protect the Environment and to protect All of the people along the Rabbit River.

For 20 thousand years the water has moved down the East side of the ridge. The water broke through the Ridge north of us and the government paid to repair the damage with pushed the water on to section 32 with no help for us. When the Ridge was damaged by the water breaking through causing damage to Crops and to the land.

If any questions please call me at 218-671-5365.

Robert L. Walz

STATE OF MINNESOTA
Before the
BOIS DE SIOUX WATERSHED DISTRICT
SITTING AS THE DRAINAGE AUTHORITY FOR
TRAVERSE COUNTY DITCH NO. 35

In the Matter of:

**the Petition to Improve
Traverse County Ditch No. 35**

ORDER FOR PUBLIC HEARING

At a public meeting conducted by the Bois de Sioux Watershed District (the "District"), sitting as the drainage authority for Traverse County Ditch No. 35 (TCD #35), on June 17, 2021, Manager _____ moved, seconded by Manager _____ for adoption of the following Findings and Order:

Findings:

1. The District is the drainage authority for TCD #35.
2. On _____, 2021, a petition for the improvement of TCD #35 was received by the drainage authority.
3. On April 15, 2021, the drainage authority adopted findings and an order accepting the petition and appointing Moore Engineering, Inc. as the project engineer. Chad Engels, Moore Engineering, Inc., was ordered to prepare a preliminary survey and file the preliminary survey report with the drainage authority.
4. The preliminary survey report was filed with the District Administrator on May 20, 2021.
5. Pursuant to Minn. Stat. § 103E.261, subd. 1, a public hearing must be noticed by mail to petitioners, owners of property, and political subdivisions likely to be affected by the proposed drainage project.

Order:

Based on the foregoing Findings and the entire record of proceedings before the District's Board of Managers (the "Board"), the Board, acting as the drainage authority for TCD #35, hereby orders as follows:

1. A hearing on the preliminary survey report shall be held on _____, at _____ a.m. at the Bois de Sioux Watershed District Office, located at 704 Highway 75 South, Wheaton, Minnesota 56296.
2. At least ten days before the hearing, the District Administrator shall mail notice of the time and location of the hearing to petitioners, owners of property, and political subdivisions likely to be affected by the proposed drainage project in the preliminary survey report.

After discussion, the President called the question. The question was on the adoption of the foregoing Findings and Order, and there were _____ yeas, _____ nays, _____ absent, and _____ abstentions as follows:

	Yea	Nay	Absent	Abstain
Vavra	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

RE: Notification of Competitive Funding – RRWMB Water Quality Funding for Lake Traverse Water Quality Improvement Project Phase 2

DATE: June 11, 2021

The Bois de Sioux Watershed District (BdSWD) recently submitted a funding request to the RRWMB for Competitive Water Quality Funds through the RRWMB Water Quality Program. The Lake Traverse Water Quality Improvement Project – Phase 2 Project application was submitted to the RRWMB for consideration and review at the April 20, 2021 regular board meeting. The RRWMB Managers referred the Project to the RRWMB Water Quality and Monitoring Advisory Committee (WQMAC), which reviewed the Project on May 7, 2021.

At the May 18, 2021 regular RRWMB meeting, the Managers approved Funding Agreement 2021FA-06 for \$367,765.00 for this Project via Resolution 2021R-15. The Project was approved as submitted and as recommended by the WQMAC. The BdSWD match is \$325,000.00 and project expenses will be on a reimbursement basis. Expenses can occur starting on May 18, 2021.

Extensions or other modifications to the funding agreement shall be submitted to the RRWMB three months prior to expiration on a form provided by the RRWMB to allow for adequate processing time. Requests for modification must be approved by the RRWMB Managers.

A plan for documenting project outcomes must be submitted to the RRWMB that illustrates or describes how financial investments in the project and actions taken will meet the goal(s) of the project, and outcomes will be achieved. This plan should be submitted along with the funding agreement. A final report shall be submitted to the RRWMB upon completion of the project.

Reimbursement requests shall be sent to the RRWMB and will be processed as received and will be approved during RRWMB regular monthly meetings. Expenses should be submitted no later than the second Monday of each month to ensure that RRWMB staff have adequate time to process expenses for reimbursement.

Supporting materials should be submitted with invoices and the RRWMB reserves the right to request additional information about project expenses and to delay processing of reimbursements until all information is received to meet RRWMB standards. Congratulations on your successful application and the RRWMB looks forward to working with you towards the completion of this Project. Should you have any questions about this process, please contact our office.

MEMO

TO: Lake Traverse Water Quality Improvement Project – Phase II Affected Landowners

FROM: Jamie Beyer, Administrator

DATE: June 18, 2021

RE: Notice of Public Hearing

NOTICE OF PUBLIC HEARING

On Thursday, July 15, 2021, at 10:00 AM, the Bois de Sioux Watershed District Board of Managers will hold a public hearing, pursuant to Minn. Stat. § 103D.605, at the Bois de Sioux Watershed District Office, 704 Hwy 75 South, Wheaton, Minnesota 56296, to present and discuss the proposed **Lake Traverse Water Quality Improvement Project Phase II**. Phase II will stabilize and restore a public waters channel adjacent to MN State Highway 27 which discharges to TCD No. 52. Phase II is approximately 1,500 feet in length with the upstream end of the project located at a Highway 27 centerline culvert and the downstream end of the project at the confluence with TCD No. 52. Phase II will resolve erosion, incision, and bank failure within a contributing drainage channel outletting into the recently constructed Phase I channel of TCD No. 52. The project will also address Highway 27 right-of-way safety concerns associated with the close proximity and slope of the channel embankment relative to the highway. The estimated cost of the proposed project is \$853,000. The method by which the cost of the proposed project is to be paid is as follows: \$281,490 from the Red River Watershed Management Board; \$418,000 from the Minnesota Clean Water Fund through sponsoring agency MN Board of Water and Soil Resources; \$153,510 from the Bois de Sioux – Mustinka Comprehensive Watershed Management Plan.

From: Scott Bauer and Chad Zimmel, City of Graceville

Re: Graceville Wellhead Protection Program

Graceville is notifying neighboring and overlying units of government of its intent to amend the current wellhead protection plan. The goal of the plan is to prevent human-caused contaminants from entering our water supply wells and to protect all who use our water supply from adverse health effects associated with groundwater contamination. This notice is required by the Minnesota Wellhead Protection Rule, part 4720.5300, subpart 3.

The entire project will take approximately three years to complete. Public informational meetings will be held in the fall of 2022.

In accordance with the wellhead protection rule, the following information must be included in this notice:

1. Wellhead Protection Manager: Scott Bauer and Chad Zimmel
City of Graceville
PO Box 156
Graceville, MN 56240
 2. Unique Well Numbers: 810435 (Well #4) and 810434 (Well #5)
 3. Date Wellhead Protection Plan Must Be Completed: June 1, 2024
 4. General Project Work Plan: See attachment.
 5. Missing Data Elements Needed for Wellhead Protection Plan: If you have any information about wells within two miles of Graceville, please submit that data to us. Also, if available, please submit: 1) any existing water and related land resource plans and official controls; and 2) a description of conflicts, problems, or opportunities that you want examined and addressed in our wellhead protection plan. Thank you for your assistance in our wellhead protection efforts.

MINUTES OF VIRTUAL / CONFERENCE CALL MEETING
RED RIVER RETENTION AUTHORITY
MARCH 17, 2021

The Red River Retention Authority (RRRA) held a virtual / conference call meeting on March 17, 2020, at 9:30 a.m.

Participating were John Finney, Gary Thompson, Greg Holmvik, Rodger Olson, Roger Mischel; and Dan Jacobson (alternate for Ben Varnson) Board members; Pat Fridgen, Andrew Graham (alternate for Theresa Ebbenga) and Ted Preister, non-voting members; Keith Weston, Executive Director; Carol Harbeke Lewis, Secretary-Treasurer; Troy Daniell, Christi Fisher and Debra Walchuk, Natural Resources Conservation Service (NRCS); Randy Gjestvang, North Dakota State Water Commission (NDSWC); Rob Sip, Red River Watershed Management Board (RRWMB), William A Hejl and Jacob Gust, Rush River Water Resource District; Dan Money, Two Rivers Watershed District Administrator; Jerry Bents, Mike Opat and Tony Nordby, Houston Engineering, Inc.; Pat Downs, Moore Engineering, Inc.; Morrie Lanning, Barr Engineering Co.; and Bert Quintero, Midwest Radio of Fargo-Moorhead.

John Finney called the meeting to order and introductions were made.

Agenda

It was moved by Rodger Olson, seconded by Roger Mischel and unanimously carried to approve the order of the agenda. Upon roll call vote, the motion carried unanimously.

Minutes

It was moved by Gary Thompson, seconded by Greg Holmvik and unanimously carried to approve the minutes of the December 10, 2020, meeting. Upon roll call vote, the motion carried unanimously.

Financial Report

The Secretary-Treasurer presented the Financial Report.

Bills

It was moved by Roger Mischel and seconded by Rodger Olson to approve the wire transfers, as presented. Upon roll call vote, the motion carried unanimously.

Update on evaluating benefits for flood damage reduction projects

Discussion was held regarding the evaluation of benefits for flood damage reduction projects and reaching out to various state agencies for information. Keith Weston said there is not as much information available as thought, but some has been compiled and they will continue moving forward to accumulate additional information to present to state legislators.

Rob Sip looked into the USDA risk management dataset. Information can be sorted by county, state, and type of damage to crops, but cannot be sorted by watershed. Looking at 2019 and 2020 damage from flooding, frost damage, cold weather and rainfall in Minnesota, there was well over \$1 million in crop damage in 2020 alone. There is good information available, but it is time consuming. FEMA also has large datasets.

Randy Gjestvang said an extensive analysis of flood damage was done in North Dakota a while ago that would also have useful information.

NRCS report

Debra Walchuk reported on the status of RCPP Watershed Plans in Minnesota. There are 6 active planning agreements and \$148,272.57 was paid to Minnesota watershed districts during the 4th quarter of 2020. A total of \$4,286,089.35 has been paid out since the start of the program.

Christi Fisher reported work is finishing up on the final steps for the Upper Maple River, North Brach Park River and Rush River Watershed Plans in North Dakota. She explained the effort required to get through the final steps of the process and that things are going well. Work also continues on the Tongue River and Shortfoot Creek Plans

New NRCS / RRRR Memorandum of Understanding (MOU)

Mr. Weston has been meeting with administrators to review progress on project planning activities and how to best utilize time and funding. The current MOU with the RRRR expires in May 2021. A new MOU has been drafted and is in review. A meeting is scheduled with the NRCS next week to discuss the matter.

Outreach - Red River Basin Mapping Project

Rob Sip presented a series of maps developed with Houston Engineering, Inc. The main intent is to update a RRWMB project map. One of the key issues is the ability to share information with state and federal partners to show what has been done and making sure all concerns relating to habitat, water quality, flood damage reduction, etc. are met. This would require a huge effort to put the dataset together for the RRWMB.

Mr. Weston said he would like to see this done for the RRRR through the entire basin. Maps showing the location of current projects, easements, communities, and broad basic information is valuable and could be used for a new watershed plan.

Randy Gjestvang said North Dakota would have maps of Red River Joint Water Resource District (RRJWRD) projects that have received state cost-share. One map shows added storage volume for flood damage reduction and another with public lands. Mr. Gjestvang believes the maps are of similar quality.

Mr. Weston said the maps would show efforts on both sides of the Red River and the importance of continuity. He offered to reach out to Houston Engineering, Inc. regarding the scope of work and estimated cost.

The Board indicated support for the project. Mr. Finney said the information could be made available on the RRRRA website. Mr. Olson said it would be good to have the information in one user friendly place and emphasized the importance of scheduling updates to show progress to legislators.

It was moved by Rodger Olson and seconded by Greg Holmvik to proceed with the Red River Basin Mapping Project. Upon roll call vote, the motion carried unanimously.

Outreach – public service ads and announcements

Bert Quintero met with the Board to discuss options for public service ads and announcements on KFGO-AM Midwest Radio of Fargo-Moorhead. She played two ads on which the Board provided input and suggestions.

It was moved by Gary Thompson and seconded by Dan Jacobson to approve the proposal from KFGO-AM Midwest Radio of Fargo-Moorhead for RRRRA public service ads and announcements at a cost of \$7,875. Upon roll call vote, the motion carried unanimously.

Outreach - USGS Flood Poster and Story Map

Mr. Weston, Mr. Sip and Mr. Gjestvang have met and discussed updating the USGS 1997 Red River Flood Poster and creating a story map. The USGS is unable to work on the project this fiscal year but could possibly start on the project in the next fiscal year, after October 1, 2021.

A story map is an interactive map that provides additional information when someone clicks on a site. Story maps are costly to produce, but there may be cost-share opportunities in the future with the USGS. The estimated cost is \$30-50,000. Printing costs could also be shared. The information could be displayed at upcoming conferences.

The Board directed Mr. Weston to continue working on the matter with Mr. Sip and Mr. Gjestvang and come back with a proposal at a future meeting.

2021 draft Red River Basin Retention Project Prioritization List

Mr. Weston updated the Board on the Red River Basin Retention Project Prioritization List. The list will be reviewed and updated annually.

Strategic planning efforts

Mr. Weston reviewed the final draft of the *RRRA Strategic Plan*. The plan will be reviewed annually and updated as needed. It was moved by Rodger Olson and seconded by Roger Mischel to approve the *RRRA Strategic Plan*. Upon roll call vote, the motion carried unanimously.

Agency and partner reports

Andrew Graham reported on various ongoing projects in Minnesota. The Flood Damage Reduction Work Group hopes to complete the process of updating technical papers for project planning by this spring.

The Minnesota DNR is partnering with various groups to look for ways to synergize and multiply its efforts for farmers to apply best management practices.

Minnesota continues to work with the Diversion Authority and Corps of Engineers through a series of issues on the lower Otter Tail River.

Rob Sip said Minnesota fisheries staff members will give a presentation at the next RRWMB meeting. Anyone interested is invited to attend.

Randy Gjestvang reported the North Dakota legislature is in session and continues to work through funding bills. They are looking at bonding for the Metro Flood Diversion Project and the Mouse River Flood Control Project to free up funds for other water projects. A two-year water study will likely result from one bill being considered. Legislation relating to drain tiling is going well with good cooperation between contractors and water resource districts. Some reformulation of the State Water Commission is also being considered.

Ted Preister reported the key thing the Red River Basin Commission is working on is Lower Red Retention. Another meeting is planned in a couple weeks. Local consultants are scaling up their work to compile information to help people understand hydrology in the watershed. Mr. Preister thanked Mr. Weston for the work on outreach. He hears comments from people almost weekly.

Meeting schedule

The next RRRA meeting is scheduled for June 16, 2021, at 9:00 a.m. It will be determined around June 1, 2021, whether to meet in person or hold a virtual meeting.

Adjournment

There being no further business to be considered by the Board, it was moved by Roger Mischel, seconded by Gary Thompson and unanimously carried to adjourn the meeting.

Investing in and Managing the Watershed of the Red River Basin

June 15, 2021
Jim Schowalter
Commissioner
Minnesota Management and Budget
658 Cedar Street
St. Paul, MN 55155

Dear Commissioner Schowalter:

On May 10, 2021, Minnesota Management and Budget (MMB) sent a memo to officials of local governments and political subdivisions regarding 2022 capital budget instructions. The Red River Watershed Management Board (RRWMB) is a joint powers board of seven watershed districts in the Red River Basin (RRB) of Minnesota. We are aware that none of our member watershed districts received this recent memo from MMB. On behalf of our membership, we request that watershed districts be included in future MMB notifications related to fiscal and budgetary matters.

Our member watershed districts develop, construct, maintain, and operate many public infrastructure projects in the RRB including but not limited to large-scale flood impoundments, public drainage systems, and water quality projects. For flood control projects, funds are primarily received through the Minnesota Flood Hazard Mitigation (FHM) Program that is managed by the Minnesota Department of Natural Resources (DNR). The FHM Program requires a 50 percent match from local sources, with the RRWMB and its membership committing funds towards this match requirement. The RRWMB designates funds through project funding agreements, which legally obligate the RRWMB to allocate and disburse funds towards flood mitigation and infrastructure protection projects of our members.

We realize that the May 10, 2021 memo indicates that funding requests normally submitted to the DNR for FHM Program funding should continue to be submitted to the DNR. However, we do not believe that the State of Minnesota fully understands the financial need across the state to protect public infrastructure investments from flooding, severe climate events, and extreme weather. While flood mitigation projects in the RRB primarily provide benefits at the local and regional level, the State of Minnesota benefits from our efforts through public infrastructure protection, enhanced water quality, climate resiliency, and increased habitat levels.

The Minnesota State Water Plan recently updated in 2020 has an entire chapter focused on water storage on the landscape and several Minnesota agencies support this Plan. There are also additional state agency plans that call for specific landscape actions. Over the last two to three years, there have been several calls to action for water storage on the landscape by state agencies and the Minnesota Legislature, with limited to no funding being allocated to water storage efforts through these calls to action other than regular bonding cycles.

Office Location • 11 Fifth Avenue East, Suite B • Ada, MN 56510 • www.rrwmb.org • 218-784-9500 (Main Office)

Investing in and Managing the Watershed of the Red River Basin

According to the DNR, known needs for the FHM Program is approximately \$366 million as of April 2021 (attached). While there have been recent bonding funds allocated for the FHM Program, there was over \$100 million in crop damages alone in the RRB of Minnesota in 2019 and 2020, with some areas having record floods. In 2019, a high percentage of agricultural crops were never harvested in the RRB, thus severely impacting farm income and eroding farm equity and financial reserves. Protecting agricultural lands and related infrastructure is equally important as protecting public and private infrastructure within cities.

The RRWMB realizes that there are many needs and pressures for state funding across Minnesota. We ask that MMB further coordinate with DNR and other state agencies and partners to request adequate and consistent funding for the FHM Program and other state programs that address water storage efforts of local units of government. New agency programs are not necessary as the funding infrastructure is already in place through the FHM Program. It should also be noted that FHM Program funds are passed through the DNR to local governments. We would like to work with MMB and DNR to highlight this to state legislators and to communicate the need for stable and consistent funding for water storage efforts.

When legislative agreements are not reached during bonding years or when agencies do not request adequate funding levels, this can impact the timing of construction of water storage projects. As a result, construction delays occur, coordination of funding partners is affected, and construction costs increase. Alignment of local, state, and federal funding partners requires much time and effort at the local level, and this can take several years.

The RRWMB has taxing authority and has co-funded approximately 60 flood projects and 300 farmstead ring dikes since 1976. Significant financial investment has been made by the RRWMB, its members, and several funding partners to protect public and private infrastructure in the RRB of Minnesota. To create awareness of existing efforts, the RRWMB has 11 flood damage reduction projects currently in its funding process, with total/original RRWMB commitments being over \$26 million. These funds are also matched by our membership and together our funding coupled with local sources can only fund up to 50 percent of total project costs.

In addition, the RRWMB presently has 13 water quality projects in its funding process, with total/original RRWMB commitments being over \$2.6 million. RRWMB funds are being matched with additional funds over \$13 million through our members and other sources. Attached to this letter are factsheets for some of the flood projects in the RRWMB funding process for your information.

Investing in and Managing the Watershed of the Red River Basin

The RRWMB also requests a meeting to discuss new application processes and auditing/reporting requirements by MMB that trickle down to DNR and ultimately to RRWMB membership. Increased reporting and accountability to MMB and DNR is important, but this activity requires additional time and local staff resources to meet these requirements. Our membership is concerned about contract terms and the level of effort for our membership to meet the provisions of contract template language.

We also encourage a higher level of coordination and communication in streamlining the processes occurring within agencies that have similarly aligned goals that are conducive to local partnerships. The MMB and DNR can play a pivotal role in coordinating with all state agencies so that our membership can focus on meeting the water storage, infrastructure protection, water quality, climate resiliency, and habitat needs of the RRB of Minnesota.

The RRWMB is available as a resource, and we look forward to meeting with your agency. Please contact Robert L. Sip, RRWMB Executive Director for inquires and additional information. Mr. Sip can be reached via email at rob.sip@rrwmb.org or by cell phone at 218-474-1084. Thank you for considering our concerns.

Sincerely,

A handwritten signature in blue ink that reads "John Finney".

John Finney
